WHEN GAMES CAN
**equip our
youth**
FOR LIFE

NGC has been shaping young lives, particularly through Sport, for decades. Recognizing that the earlier the age at which we engage them the better, NGC has been a mainstay of the Primary Schools Track and Field Games in the Moruga Zone and in the St. Patrick and Caroni Education Districts for many years. And in La Brea, NGC's subsidiary, National Energy, hosts the Zonal Games. Together, these constitute some of our key pipeline communities.

The science and coaching behind NGC's robust *Right on Track* Development Programme prepares many budding athletes for the intense competition at these Games. Both avenues single out potential athletic stars for participation at a national level, and perhaps, ultimately, as members of the NGC/NAAA Youth Elite Programme.

More than the benefits of physical and tactical development, NGC's holistic involvement in Sport, at all levels, reinforces the dynamics of teamwork and the positive influences of mentors and coaches to build character, discipline and self-esteem.

These, we believe, are qualities that define our most accomplished citizens.
