Attention Motorists and Pedestrians

UNIPET HARKNESS ENERGY LIMITED CNG SERVICE STATION PROJECT

The National Gas Company of Trinidad and Tobago Limited (NGC) will soon commence construction of a natural gas pipeline to the Unipet Harkness CNG Service Station that is currently being built at #2 Old Southern Main Road (SMR), McBean, Couva. The pipeline will begin from NGC's existing Ø406mm (16") natural gas line located west of the station's location. It will run east for approximately 400m to the Old SMR and then proceed south for approximately 60m along the Old SMR before turning east into the station's compound.

The works comprise the laying of pipeline by "Open Cut" and "Horizontal Directional Drilling (HDD)" construction methods, and there will be minimal disruption to the road surface and to the traffic flow. Traffic detours will be required only during construction of the segment running along the Old SMR.

Details of the planned construction activity are as follows:

Duration of Works: 68 calendar days

Commencement Date: Monday March 13, 2017

Days of Work: Monday to Friday

Hours of Work: 7:00 a.m. to 5:00 p.m.

NGC is asking all motorists and pedestrians to exercise caution when in the vicinity of the works. Police officers and traffic wardens will be on hand to manage the flow of traffic as necessary.

NGC assures that every effort will be made to minimize the inconvenience to the public, and that these activities will be undertaken with safety as our highest priority.

If you have any concerns during the period of construction, please contact:
