

**THE NATIONAL GAS COMPANY
OF TRINIDAD AND TOBAGO LIMITED**

WHEN EXPANDING
OUR HORIZONS CAN
transform
OUR FUTURE

Collaboration. Creativity. Innovation. Entrepreneurship.

After 40 years of pioneering effort and robust growth, these values are key to NGC's resolve to keep its business model relevant. The long-term survival of the local energy industry depends on maximizing value and competitiveness.

NGC has been leading from in front.

Regionally, heads of NGC and our subsidiaries have been marketing and leveraging our experience and expertise across the region in Jamaica, Guyana, Cuba and Suriname. Members of the Guyana Energy Agency recently visited NGC CNG, and further opportunities for cross-border collaboration abound.

NGC is forging strong linkages in Latin America, the most robust of which is our relationship with Venezuela. We have grown our capability to participate in and drive projects beyond our shores as we actively seek partnerships further afield. Emerging energy economies are creating the impetus for us to export our energy capabilities.

Over several years we have probed the potential for investment in East and West Africa. In 2017, NGC forged agreements and partnerships in Mozambique, Ghana and Tanzania.

By working differently, and with urgency, NGC is exploring all avenues that lead to a profitable and sustainable energy future for Trinidad and Tobago.
