

Reaping the Rewards of Resilience

The NGC Group Wins Prestigious AMCHAM T&T Awards

At the recently held AMCHAMTT Virtual HSE Conference, The NGC Group copped three (3) awards in recognition of The Group's business efforts during the COVID-19 pandemic:

- The NGC Group won the inaugural Business Continuity Planning (BCP) and Surviving the Pandemic Award – in the large category of the Energy and Manufacturing Sector – for its efforts and success in ensuring the continued safety of its operations and stakeholders throughout the Covid-19 pandemic through the Group's BCP team.

- National Energy received the BCP Planning and Surviving the Pandemic Award – in the small-medium category – for its Towage Operations Continuity Plan which served to protect the crew members and integrity of the Company's vessel assets, while ensuring there was no disruption in operations and the provision of services to all major ports in TT.

- National Energy was also awarded Most Outstanding OSH/Environmental Project – in the small-medium category – for its ttEngage investor platform, which not only works to ensure that projects are developed in line with HSE standards, but also facilitates the enhancement of TT's investor climate.

These accolades are indicative of industry-wide respect and admiration for the work of The NGC Group, particularly through the trials of the past few months.

Thanks to our Group BCP and the employees across the Group.
