

50 YEARS of Pan Trinbago

For NGC - a keen sponsor of the arts and culture for many years - the steelpan has been one of our lasting and rewarding investments

Focused on building the sustainability of the national pan industry and those who seek to preserve and elevate the artform and music, NGC continues to invest in a number of initiatives: building capacity among pannists with our music literacy, pan manufacturing and tuning programmes.

We are also directing attention towards building a repository of music scores for locally produced pan compositions.

Congratulations PanTrinbago

We appreciate your work as a custodian of this integral element of our culture
