## Extension of Pipeline Works - Dock Road and Wrightson Road, POS

The National Gas Company of Trinidad and Tobago Limited (NGC) advises that it will extend construction works on its project to divert a segment of its existing 16-inch low-pressure pipeline located in Dock Road and Wrightson Road, Port-of-Spain. NGC's 16-inch pipeline project involves upgrading services of low-pressure customers by switching to a higher-pressure pipeline operating system.

**The works will continue from Friday 29th July 2022 to Monday 1st August 2022 and include the following activities:**

- **Open cutting of Wrightson Road**
- **Installation of pipeline**
- **Reinstatement of roadway on Wrightson Road**

**This will result in partial access to Wrightson Road for the following dates and hours of the project works:**

**Friday 29th July 2022 from 7:00 pm to Saturday 30th July 2022 until 10:00 am  
(western carriageway diverted; eastern carriageway open)**

**Saturday 30th July 2022 from 7:00 pm to Sunday 31st July 2022 until 10:00 am  
(eastern carriageway diverted; western carriageway open)**

**Sunday 31st July 2022 from 7:00 pm to Monday 1st August 2022 until 4:00 am  
(alternating diversion of eastern and western carriageways)**

A comprehensive traffic management plan continues to be implemented in collaboration with the Trinidad and Tobago Police Service (TTPS) with the following considerations:

- During the open cut works on the western carriageway of Wrightson Road, police will redirect all incoming traffic to the eastern carriageway
- During the open cut works on the eastern carriageway of Wrightson Road, police will redirect all incoming traffic to the western carriageway
- Traffic cones will be utilised to clearly separate the lanes on the carriageways
- There will be advance notice/signs for commuters along Wrightson Road.

Every effort will be made to minimise inconvenience to the general public.

NGC wishes to assure you that all works will be conducted with public safety as its highest priority.

All activities will be conducted in accordance with NGC's Environment, Safety and Security Policies and Procedures, as well as all applicable codes and standards. Should you have any concerns, please contact NGC's Control Room at 800-4GAS (4427).
