Media Release

NGC advises of the continuation pipeline works along Wrightson Road

10 August 2022

The National Gas Company of Trinidad and Tobago Limited (NGC) advises that it continues planned works on its project to divert a segment of its existing 16-inch low-pressure pipeline located on Wrightson Road, Port-of-Spain. NGC's 16-inch pipeline project involves upgrading services of low-pressure customers by switching to a higher-pressure pipeline operating system.

The works will take place between Wednesday 10th August from 7:00 pm to Thursday 11th August until 4:00 am.

Works will include reinstallation/paving of Wrightson Road and will occur on the eastbound lane (exiting Port of Spain). During this period commuters will have partial access to Wrightson Road. There will be some movement of heavy machinery.

A comprehensive traffic management plan will be implemented and the Trinidad and Tobago Police Service (TTPS), will be on hand to assist with traffic management with the following considerations:

- During works on the eastern carriageway of Wrightson Road, police will redirect all outgoing traffic to the western carriageway
- Traffic cones will be utilised to clearly separate the lanes on the carriageways
- There will be advance notice/signs for commuters along Wrightson Road

NGC wishes to assure the public that all work will be conducted with safety as its highest priority and every effort will be made to minimise inconvenience to the public.
