

**THE NATIONAL GAS COMPANY
OF TRINIDAD AND TOBAGO LIMITED**
www.ngc.co.tt

CALL BEFORE YOU DIG

NGC's natural gas pipelines are buried safely underground.

They are marked in a variety of ways, making their locations easy to identify. Just look for yellow marker posts or plates, as well as yellow stencilled markers on roadways.

If you intend to

- Execute construction activity;
- Use heavy equipment;
- Install pipeline, cable, ducting, etc.;
- Install signage, barriers, fences, poles, etc.;

or conduct any works within **25 feet of NGC's pipeline corridor** and related facilities, you must adhere to the following guidelines.

- A written notice must be given to NGC two (2) weeks prior to proposed activity, including details such as nature of works, sketches and construction drawings as appropriate.
- If the location of works relative to NGC's assets is unclear, kindly notify NGC and we will advise.

Correspondence should be directed to:
NGC's Right of Way Maintenance Department
ROWMaintenance@ngc.co.tt

In the event of an emergency, please contact, **NGC's toll free number**
800-4GAS (4427)
